Beyond Nutrition S.A.R.L.
21 rue de Savelborn
7660 Medernach
LUXEMBURG

Date 25.08.2026

Customer no. 10087012

REPORT

Order **3842681** Beyond Magnesium
 Sample no. **246012**
 Sample acceptance **19.08.2026**
 Sample taker **Client**
 Customer sample description **Beyond Magnesium Master Blend**

LOT-No./Batch **EA20043000401**
 BBD **01.2029**
 Packaging **2x Original, 83 g, 90 capsules**

Unit Result Declaration Reg. (EU) Substance Method
 2023/915

Heavy metals

Lead (Pb)	mg/kg	<0,50	3	OM	DIN EN 15763 : 2010-04
Cadmium (Cd)	mg/kg	<0,20	1	OM	DIN EN 15763 : 2010-04
Mercury (Hg)	mg/kg	<0,02	0,1	OM	DIN EN 13806 : 2002-11
Arsenic (As)	mg/kg	<0,50		OM	DIN EN 15763 : 2010-04

Minerals

Potassium (K)	mg/3 capsules	237	250	OM	DIN EN 16943 : 2017-07
Magnesium (Mg)	mg/3 capsules	372	350	OM	DIN EN 16943 : 2017-07

Gravimetric analysis

Weight per piece	*) g	0,884		OM	gravimetric method
------------------	------	-------	--	----	--------------------

Explanation: The symbol "<" or n.q. in the result column means, the parameter concerned is not quantifiable at the limit of quantification shown opposite.

Explanation: OM = on original matter; DM = on dry matter base

The calculation of the measurement uncertainties given in the following table is based on the GUM (Guide to the expression of uncertainty in measurement, BIPM, IEC, IFCC, ISO, IUPAC, IUPAP and OIML, 2008) and the Nordtest Report (Handbook for calculation of measurement uncertainty in environmental laboratories (TR 537 (ed. 4) 2017)). This is therefore a very reliable value with a 95% confidence level (confidence interval). Deviations from this are indicated as entries in the column "Deviating determination method".

Measurement uncertainty	Deviating determination method	Parameter
13%		Magnesium (Mg)
11%		Potassium (K)

According to the extent of the analysis the sample complies with the requirements of Commission Regulation (EU) 2023/915 of 25 April 2023 on maximum levels for certain contaminants in food, in version currently in force.

The sampling date is a customer information.

Remark tablet weight: average of 10 tablets.

The activities reported in this document are accredited according to DIN EN ISO/IEC 17025:2018. Only not accredited activities are identified by the symbol "n.q."

Date 25.08.2026
Customer no. 10087012

REPORT

Order **3842681** Beyond Magnesium
Sample no. **246012**

Start of testing: 19.08.2026
End of testing: 25.08.2026

The results are related only to the samples tested. In cases where the laboratory has not been responsible for sampling, the reported results apply to the samples as received. The laboratory is not responsible for the information provided by the customer. The customer information, if any, presented in this test report is not subject to the accreditation of the laboratory and may affect the validity of the test results. Duplication of this document or of parts of it requires the authorization from laboratory.
In conformity assessment, the economic approach is used as the decision rule (a non-conformity exists if the measurement result is included measurement uncertainty above the specification or standard), as long as nothing else has been determined by corresponding legal or normative bases.
